#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5946062 A.

Per claim 1, 062 teaches a liquid crystal display device comprising: a liquid crystal display panel having one or more wires on a substrate thereof [see wires DMg on the panel substrate shown in figure 9]; and a housing having holding portions configured to hold opposing end portions of the liquid crystal display panel [see SHD, specifically the vertical side portion and the holes in the vertical side portions], wherein a spacing between a portion of an outermost wire of the one or more wires which is located in the vicinity of the holding portion and a portion of an edge of the substrate which is located in the vicinity of the holding portion is larger than a spacing between a portion of the outermost wire which is other than the portion located in the vicinity of the holding portion and a portion of the edge of the substrate which is other than the portion located in the vicinity of the holding portion [see figure 19, the wires bend to the left of the figure, at any point past the bending point of the wire, the wire is closer to the left edge of the substrate than the same wire at a point near the bottom of the substrate].

Per claim 4, 062 teaches the liquid crystal display device according to claim 1, wherein a non-display region is formed on a peripheral portion of the liquid crystal display panel, and the outermost wire is provided on the non-display region to extend substantially along an end portion of the liquid crystal display panel [see figure 19, the wire are on the periphery].

Per claim 5-6, 062 teaches the liquid crystal display device according to claim 1, wherein the housing is made of metal [see column three, last full paragraph].

Art Unit: 2871

# Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

### Response to Arguments

Applicant's arguments filed 12/22/06 have been fully considered but they are not persuasive. Figure 1 of 062 shows the support SHD surrounding and clamping the edge of the display PNL. Figure 19 shows the electrodes are formed on the substrates that form the panel. Accordingly, Examiner contends figures 1 and 19 show the substrate held. Furthermore, if the panel wasn't held by SHD it would able to slide around.

### Allowable Subject Matter

Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Dudek whose telephone number is 571-272-2290. The examiner can normally be reached on 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on 571-272-1787. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
